

We provide strategic direction, tax, and financial reporting service solutions.

Technology Companies

The management of today's technology companies are faced with highly competitive markets subject to rapid and extreme levels of change. This results in a variety of unique operational, financial, and organizational challenges and concerns.

These concerns include:

- ⦿ Access to financing & investors
- ⦿ Debt vs. equity ownership structures
- ⦿ Proper entity selection
- ⦿ Revenue recognition requirements
- ⦿ Capitalization of software development costs
- ⦿ Financial & tax accounting methods
- ⦿ Employee compensation and benefits
- ⦿ Worker classification issues
- ⦿ Research & development tax credits
- ⦿ Multi-state taxation considerations
- ⦿ International operations & taxation
- ⦿ Mergers & acquisitions
- ⦿ Business succession

As your business continues to evolve, your trusted advisor must stay one step ahead.

FMD professionals continuously monitor economic issues and anticipate your company's future needs. This proactive mindset is the cornerstone of sound financial planning and separates financial strategists from historical accountants.

We treat our client's business as our own.

We spend time at your facility and participate in planning for your business. The experience we bring to your business is key for advancement and growth in a variety of technology disciplines including:

- ⦿ Software development
- ⦿ Advanced & robotic manufacturing
- ⦿ E-Commerce
- ⦿ IT Services
